#### 1. Pull an image from Docker hub and run it in Docker Playground

The image shows a two-part process. The top part is a screenshot of the Docker Hub repository page for 'uifd/ui-for-docker'. The page indicates the repository is deprecated and suggests using Portainer instead. It shows the Docker Pull Command as 'docker pull uifd/ui-for-docker'. The bottom part is a screenshot of the Docker Playground interface. It shows a session titled 'cd9an2u3\_cd9av060qau0008hbjso' with an IP of 192.168.0.13. The terminal output shows the following commands and results:
